

MINI PROJECT PRESENTATION

BoutiquePro *AI*

Smart Boutique Management & Customer Experience Platform

Department of Computer Science and Engineering · AI & ML

Presented by: [Your Name] · [Your College Name] · [Your Academic Year]

Made with GAMMA

THE OPPORTUNITY

One platform for the boutique's *daily rhythm*

BoutiquePro AI brings the day's moving parts into one working view.

01

Capture

Products, customers and measurements.

02

Coordinate

Orders, appointments and delivery dates.

03

Monitor

Inventory, sales and payments.

04

Personalize

AI-assisted recommendations when enabled.

Made with GAMMA

THE CURRENT FRICTION

Manual processes make small boutiques *harder to run*

The same activity becomes easier to manage when it moves from scattered records into one connected workspace.

FRAGMENTED WORKFLOW

- Customer measurements are difficult to maintain consistently.
- Custom stitching orders and delivery dates are easy to lose track of.
- Appointments, inventory, sales, and payments often live in separate records. Limited data makes personalized customer engagement harder.

connect

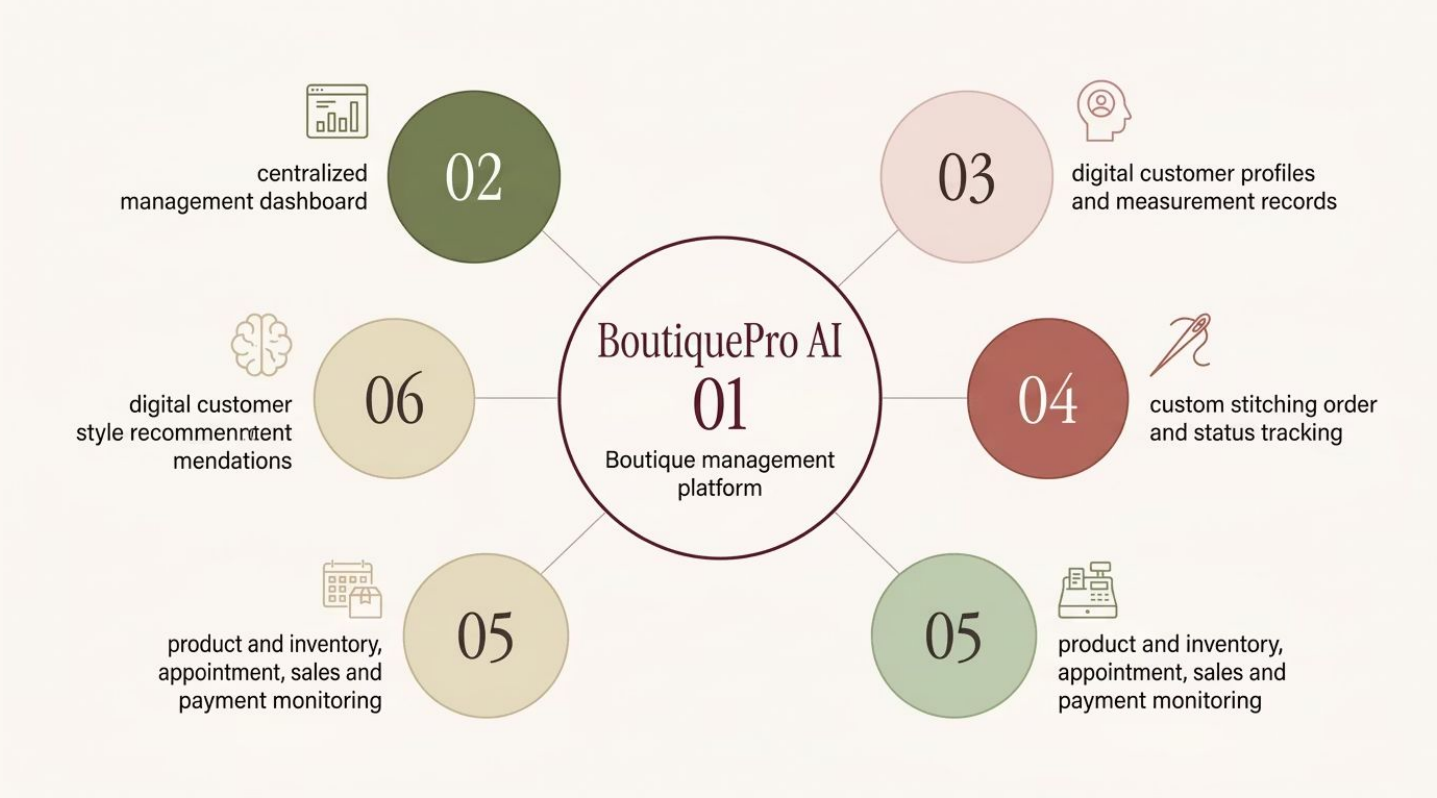

CONNECTED WORKSPACE

- Customer information stays available and consistent.
- Order status and dates remain visible.
- Better information enables more personal engagement.

Made with GAMMA

THE PLATFORM CONCEPT

BoutiquePro AI connects every *core operation*

A centralized management dashboard connects the operational record with optional AI-assisted style recommendations.

Made with GAMMA

THE FUNCTIONAL SCOPE

Seven modules turn boutique activity into *one view*

Dashboard

Business overview

Products

Inventory management

Customers

Profiles and measurements

Stitching

Order status tracking

Appointments

Booking and visibility

Sales

Payments and monitoring

AI Style Assistant

Optional recommendations

Made with GAMMA

OPTIONAL INTELLIGENCE

AI adds a layer of *personal style*

The prototype can begin with predefined recommendation rules and extend later through a suitable AI model or API.

- Recommend outfits from customer preferences.
- Suggest matching colors and accessories.
- Generate product descriptions with AI assistance.
- Recommend collections for individual customers; suggest promotional content for boutique owners.

PROTOTYPE INTERFACE

Style Assistant

OPTIONAL

CUSTOMER PREFERENCE

Soft tailoring · warm neutrals

Blush | Ivory | Gold accent

SUGGESTED COLLECTION

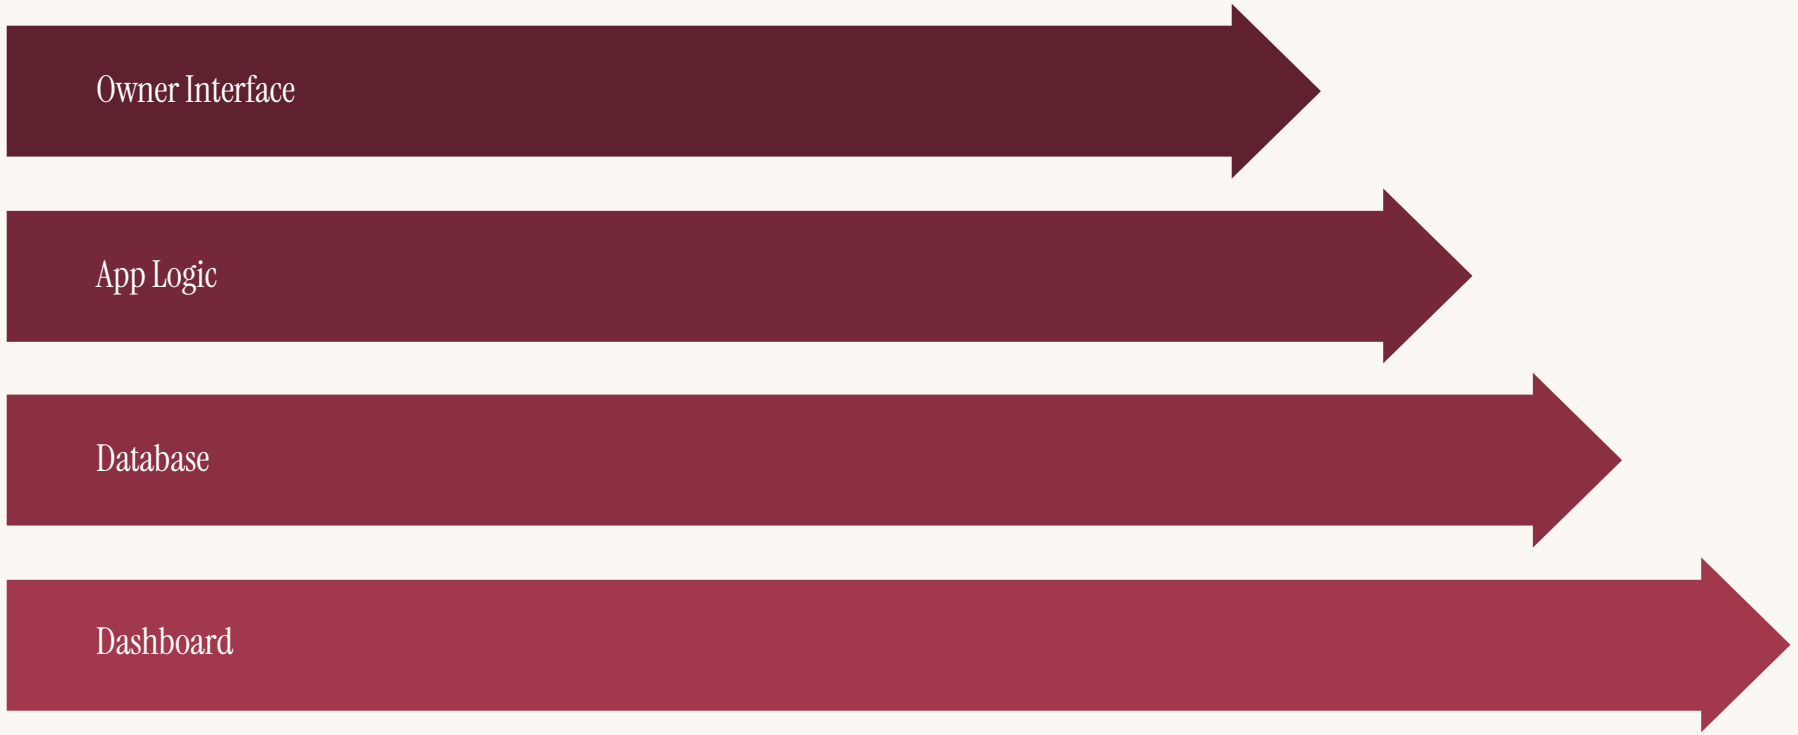

Three coordinated looks

Outfit | Accessory | Color match

Made with GAMMA

SYSTEM DESIGN

A simple architecture supports a *complete workflow*

Architecture flow: User Interface → Application Logic → Database → Dashboard & Reports, with an optional AI component connected to application logic.

Made with GAMMA

IMPLEMENTATION PROPOSAL

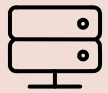

Proposed stack: fast to build, *practical to extend*

Base44 is proposed as the development platform, with exact backend services determined by the project's available capabilities.

Base44

Website development and responsive frontend generation.

Services

Application services and data storage supported by Base44.

AI layer

Optional AI API or recommendation logic.

Validation

Functional testing and usability testing.

The stack favors a fast prototype while keeping room for later service and AI decisions.

Made with GAMMA

RELEASE PATH

The first release organizes operations; the roadmap expands *intelligence*

- Expected benefits: better order tracking, less manual record-keeping, clearer inventory visibility, more organized customer information, and easier appointment management.
- More informed business decisions through dashboards and reports.
- Future scope: online shopping, customer tracking portal, WhatsApp notifications, AI fashion recommendations, sales forecasting, and multi-branch management.

Operational clarity first; broader intelligence follows the validated foundation.

PROJECT TAKEAWAY

Transforming Boutique Management Through *Technology*

- BoutiquePro AI brings customers, stitching orders, inventory, appointments and sales into one platform.
- AI-assisted features can improve personalization and decision-making.
- The concept is practical for small boutique businesses and designed to scale.
